

Basic operation - 1

The image shows a screenshot of an iOS application interface for editing CSV files. At the top, there is a status bar with the time 1:53 and battery level. Below it is a menu titled "Column: Name" with options: Cancel, Delete, Insert, Move, Sort ascending, Sort descending, Copy & append, and Change column width. The main interface features a table with a header row "Row No." and four data rows numbered 1 to 4. To the right of the table is a "[+Col]" button. Below the table is a "[+Row]" button. On the right side of the interface, there are several icons: a refresh icon with "UPDATE", a save icon, a share icon, a folder icon, and a question mark icon. A search bar is located at the top right of the interface. Callouts provide instructions for various actions: "Tap to show menus." points to the menu icon; "Show / Type filename." points to the search bar; "Long press to edit column. * Delete, insert, move, sort, copy and change width." points to a column in the table; "Tap to add row." points to the "[+Row]" button; "Long press to edit row. * Delete, insert, move and copy." points to a row in the table; "Tap to add column." points to the "[+Col]" button; "Tap to export file." points to the refresh icon; "Tap to open file." points to the folder icon; "Tap to visit Web manual." points to the question mark icon; "Tap to save file, to 'iPhone/CsvMaster/'." points to the save icon, with a note "←V1.19.0 or later"; "The button appears when there is app later version in the App Store. Tap to visit App Store." points to the refresh icon; "Tap to visit App Store." points to the refresh icon; "Tap to add column." points to the "[+Col]" button; "Show contents, tap to edit." points to the refresh icon.

Column: Name

- Cancel
- Delete
- Insert
- Move
